## Setting the Stage: Finding the Gaps

## Finding the Gap: THCE Growth

Total Health Care Expenditures per capita grew by 4.8%, above the health care cost growth benchmark for 2014

Source: CHIA and other public sources. Inflation data from the Bureau of Labor Statistics: Consumer Price Index 12-month Percent Change. Gross State Product data from U.S. Bureau of Economic Analysis: GDP by State in Current Dollars.

## Finding the Gap: THCE Growth

Health Care Expenditures per Massachusetts resident were \$8,010 in 2014—an annual increase of 4.8%

Source: CHIA (payer-reported data) and other public sources. See technical appendix. Notes: Percent changes are calculated based on full expenditure values. Please see databook for detailed information.

## Finding the Gap: Readmissions

### Potentially Avoidable Hospitalizations per 100,000 Residents, by Condition, 2013-2014

Compared to the nation, MA averaged more potentially preventable hospitalizations for congestive heart failure and asthma in younger adults

Source: CHIA Hospital Discharge Database. Notes: All payers, age ranges vary by measures. The denominator is all Massachusetts residents for each measure.

## Finding the Gap: Utilization

Among Emergency Department (ED) visits in the past 12 months

Note: A non-emergency condition is one that respondents thought could have been treated by a regular doctor if one had been available.  
Source: 2014 Massachusetts Health Insurance Survey

## Finding the Gap: Urgent Care

HPC Selected Findings:

The number of retail clinics and urgent care centers has surged over the last 8 years in Massachusetts.

Retail clinics, located in retail stores, are typically staffed by nurse practitioners and treat a limited range of health conditions, such as minor infections and injuries. Annual data from CVS.  
Urgent care centers typically are freestanding physicians' offices with extended hours, on-site x-ray machines and laboratory testing, and an expanded treatment scope, including care for fractures and lacerations. Annual data from MDI Logistics.

## Finding the Gap: VBP/APM

<b>Standardization of APMs</b>	<ul style="list-style-type: none"> <li>Many varying quality measures increase administrative burden, but allow for tailoring to providers' improvement needs and specific populations served.</li> <li>Hard to hold their own providers accountable if attribution methodologies vary across contracts</li> <li>Hard to coordinate between providers under very different financial incentives and budget models (both FFS and various APMs), making it difficult to achieve care delivery transformation intended by each APM contract</li> </ul>
<b>Effectiveness of APMs</b>	<ul style="list-style-type: none"> <li>Reports of performance on quality measures are not timely or standardized for easy comparison and thus, not actionable</li> <li>Challenge of operating in two worlds of FFS and APMs</li> <li>Financial data not timely at all and providers experience volatility in data as claims run out occurs - making it hard to manage</li> <li>Challenge of engaging hospitals, specialists and post-acute providers, specifically</li> </ul>
<b>Interest in MassHealth and PPO APMs</b>	<ul style="list-style-type: none"> <li>Nearly all providers noted eagerness to participate in an APM offered by MassHealth</li> <li>Concern about risk adjustment methodology not accounting for challenges of MassHealth population and social needs.</li> <li>Larger providers also noted interest in PPO payment reform, although stated concerns about validity and variety of attribution methodologies and distribution of surplus to self-insured accounts.</li> <li>Challenge of care management without a PCP</li> </ul>

# Where's the fit?

## Finding the Fit: MA Introduces MIH

## MA MIH: Timeline for Implementation

Year	Event
2006	MA Passes Healthcare Reform
2010	PPACA Passed
2012	Pioneer ACOs and other similar groups are enabled by ACA
2012	MA Healthcare Reform 2.0 - CHIA and HPC
2013	Fed. Funding for State Medicaid Expansion for Preventative Care
2013	ACA Requires states to pay PCP at least what MCR pays for similar services
2013	DPH Receives Mounting Pressure from MAA and MBEMSC regarding implementation of CP
2013	MAA Sponsors a Roundtable Discussion on CP/MIH Moderated and Directed by M. Zavadsky
2013	MA-DPH-OEMS attempts to explore MIH under existing legislation
2014	First Projects presented to MA-DPH-OEMS for approval
2014	MA-DPH-OEMS Dissolves CP Committee; "Committee does not have authority to approve any programs"
2014	MA-DPH-OEMS Places a Moratorium on all new CP/MIH SPW
2014	MA-DPH-OEMS permits two programs to move forward under a SPW that is valid for 1 year
2015	Leadership change at Health Ministry throughout Key Departments
2015	MAA Sponsored Legislation Passes Creating MIH
2015	MIH Advisory Panel Inaugural meeting (November 2015)
2015	MIH Regulation Deadline (31 December 2015)
2016	MA Regulations effective (01 January 2016)

## MA Mobile Integrated Healthcare

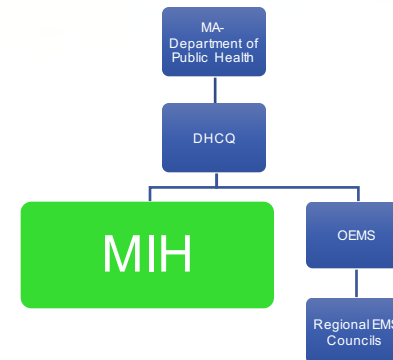

Defined in MA legislation as,

- “Mobile integrated health care” or “MIH”, a health care program approved by the department that utilizes mobile resources to deliver care and services to patients in an out-of-hospital environment in coordination with health care facilities or other health care providers; provided, that the medical care and services include, but are not limited to, community paramedic provider services, chronic disease management, behavioral health, preventative care, post-discharge follow-up visits, or transport or referral to facilities other than hospital emergency departments.”

Source: MGLc 111O § 1

## Structure of DPH

## Current Programs in MA

- There are three programs in MA
  - **Two operational programs (SPW)**
    - EasCare Ambulance Service
      - ICO, partially grant funded via HPC
    - Cataldo Ambulance Service
      - ACO, fully grant funded
  - **One Roll-out**
    - Legislatively funded Pilot
    - Alternative Destination for Behavioral Health

## Alternative Care Pathway: BH

Innovative health care pilot in Greater Quincy to treat patients with mental health or substance use disorders

\$500,000 → EMS, BH Providers, CHCs, and Hospitals in Greater Quincy

### SUMMARY OF STATUTE

- HPC and partners are to implement model of field triage of behavioral health patients under medical control by specially-trained emergency medical services providers
  - Care for appropriate patients at home by such providers in coordination with behavioral health care providers,
  - Transport of appropriate, non-medically complex patients to a behavioral health site of care
- Pilot in the greater Quincy area affected by the recent hospital closure
- Pilot to be evaluated on its effectiveness, efficiency, and sustainability by HPC

### OBJECTIVES

- 1 Test currently non-reimbursed payment for innovative model of field triage, direct care by emergency medical services (EMS), and emergency department bypass for complex behavioral health patients
- 2 Reduce emergency department boarding and hospital crowding to increase access and decrease cost
- 3 Enhancing the quality of and outcomes from behavioral health services
- 4 Ensure model has safeguards to ensure patients with medical emergencies are not bypassing emergency departments

Source: Health Policy Commission, 2015

## Alternative Care Pathway: BH

### Program development considerations

Legislation provides guidance on program framework and goals, but enables the HPC to specify use of funds

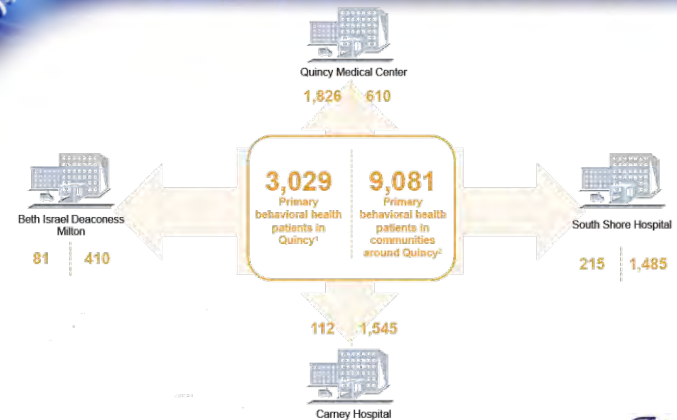

- 1 The purpose of this project is to **best match behavioral health** patients with the most **appropriate level of care**.
- 2 Effective **partnership and collaboration** of all key stakeholders (behavioral health, community health centers, EMS, hospitals, and local leadership) will be **essential**.
- 3 Funding will be focused on **supporting collaboration** and covering costs of **non-reimbursed services**.
- 4 Investments must be evaluated for **cost and quality**; patient's **experience** of care and models for **multi-sector partnership** will offer important lessons for the Commonwealth.

Investments will expedite access to appropriate behavioral health care, reduce ED utilization, reduce ED boarding, and decrease costs

Source: Health Policy Commission, 2015

## Alternative Care Pathway: BH

Source: Health Policy Commission, 2015

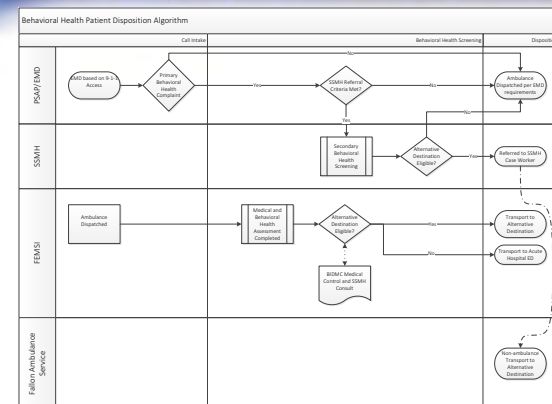

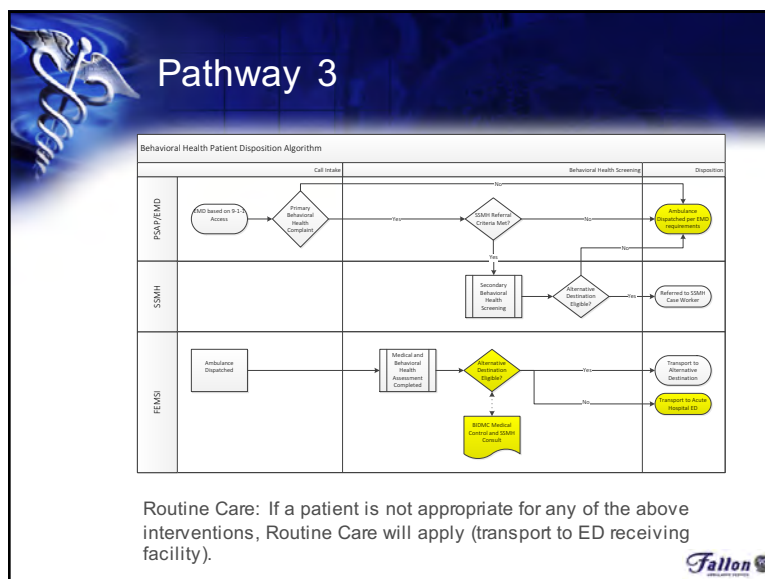

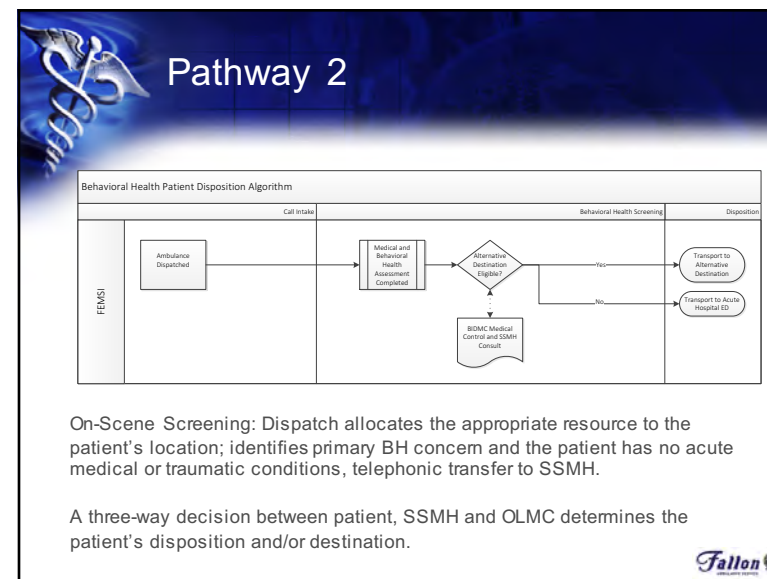

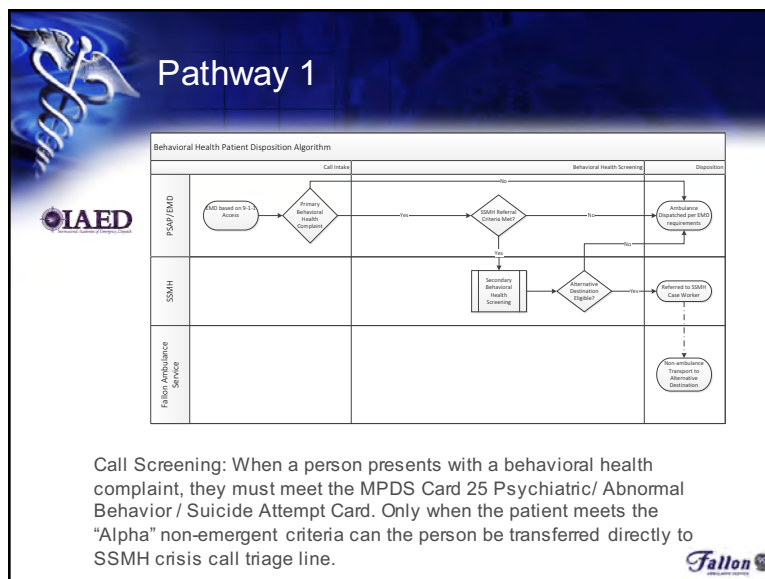

## Project Overview

- Cohort = Primary Behavioral Health patients for patients residing in community that are  $\geq 18$  y/o
- Partnering with BIDH-M, BIDMC and SSMH
- Realign Care Based on *Point of Call* and *Point of Care* pathways.

## Pathways

## Quality Metrics

Measure	Numerator	Denominator	Data Source(s)
Fallon EMS BH triage to alternate treatment site by treatment site location type	# of EMS BH triages	Total # of BH calls to 911 within Quincy	Total count from Fallon and SSMH
EMS + SSMH 911 patient phone call co-managements	# of phone call co-managements	Total # of calls to 911 Within Quincy	Total count from Fallon and SSMH
# of ED visits vs. # BH calls	# of ED visits (new and readmissions)	Total # of ED visits + # of BH calls	Total count: Fallon, Meditech/Dashboard and count from SSMH
# of patients reverted back to 911 after BH referral (time frames will be specified)	# of patients requiring EMS Response after referral to BH	Total # of BH calls to 911 within Quincy	Total count from Fallon and SSMH

Fallon

## Summary

- The purpose of this project is to best match behavioral health patients with the most appropriate level of care.
- The goal of this project is to promote placement in appropriate community based behavioral health services. Inherent in this project will be a reduction in the number of ED behavioral health visits. The collective expertise within this partnership will contribute to an increase in access to appropriate behavioral health care whereby engendering a reduction in ED utilization, ED boarding hours, and delays in access to needed healthcare.

## MPDS – Card 25 - Top

**25 PSYCHIATRIC / ABNORMAL BEHAVIOR / SUICIDE ATTEMPT**

**KEY QUESTIONS**

(Suspected and > 8) Is she violent?

Does she have a weapon?

Where is she now?

Is this a suicide attempt?

Jumpers  
Lacerations  
Near Hanging, Strangulation, etc.  
Suicidal ideation  
THREATENING SUICIDE  
Carbon monoxide/poisoning/HAZMAT  
Overdose  
Stab or Gunshot (wound)

(No) Is she thinking about committing suicide?

(Laceration) Where is she cut?

(Laceration) Is there any SERIOUS bleeding?

Is she completely alert responding appropriately?

**POST-SPRINT INSTRUCTIONS**

I'm sending the paramedics (ambulance) to help you now.

Stay on the line and I'll tell you exactly what to do next.

If it's safe to do so, observe her/him continuously (beyond being attached).

If it's safe to do so, protect her/him from her/himself.

(If party) Keep a violent or suicidal patient on the line.

In volatile/critical situations, refer to applicable law enforcement protocol.

For jumpers, notify fire or technical rescue team.

Link us X-1 unless:

Danger to Crime Scene

Violent/Combative

INEFFECTIVE BREATHING and Not alert

Control Bleeding

**LEVELS**

LEVEL	#	DETERMINANT DESCRIPTORS	++	V	W	B	CODES	RESPONSES	MODES
D	1	Not alert					25-D-1		
	2	DANGEROUS hemorrhage					25-D-2		
B	1	SERIOUS hemorrhage					25-B-1		
	2	Non-SERIOUS or MINOR hemorrhage					25-B-2		
	3	THREATENING SUICIDE					25-B-3		
	4	Jumpers (Hanging)					25-B-4		
	5	Near hanging, strangulation, or suffocation (wired)					25-B-5		
A	1	Non-suicidal and alert					25-A-1		
	2	Suicidal (not threatening) and alert					25-A-2		

## MPDS – Card 25 - Bottom

**25 PSYCHIATRIC / ABNORMAL BEHAVIOR / SUICIDE ATTEMPT**

**DANGEROUS Hemorrhage**

- Amput
- Grown
- Neck

**SERIOUS Hemorrhage**

Uncontrolled bleeding (spitting or pouring) from any area, or any time a caller reports "serious" bleeding.

**MINOR Hemorrhage**

Controlled or insignificant external bleeding from any area.

**THREATENING SUICIDE**

Persons who are threatening to commit suicide but have not yet done anything to harm themselves. If a person has already harmed her/himself but is releasing help as enemy, the suffix code for Violent (V) should be added to the Determinant Code and police should be notified.

**Problem Suffixes**

The suffix codes are added whenever the patient appears to be violent or have weapons, and aid in automatically notifying police to respond and secure the scene:

- V = Violent
- W = Weapons
- B = Both Violent and Weapons

**Rules**

1. If the actual type of suicide attempt is determined to be overdose, carbon monoxide, stab, or gunshot wound, go to and dispatch from that more specific protocol.
2. 1st party callers who are THREATENING SUICIDE should be kept on the line until responders arrive.
3. Consider call tracing if there are problems with location, identification, or information cooperation. Carefully and tactfully determine the patient's exact location.
4. Constricting or suffocating materials, such as rope, wire, or plastic bags, should be removed prior to the provision of POCs. Care should be exercised to preserve potential crime scene evidence (i.e., the issue should be left as-is unless otherwise instructed).
5. It is reasonable to utilize a police-only response when a person is THREATENING SUICIDE (no implied time sensitivity). This choice must be approved by local policy between the law enforcement and EMS-provider agencies.

**Causes of Abnormal Behavior**

- Alcohol intoxication
- Drug abuse
- Emotional and hysterical reactions
- Hypovolemic shock (low blood volume)
- Medical problems and serious illnesses
- Psychiatric problems
- Suicide attempts end threat
- Withdrawals

**Axioms**

1. Behavioral emergency patients (at any level of consciousness) are considered to be a potential risk to themselves and others.
2. Certain serious medical problems can be confused as "just a psych problem." It would be a serious EMD error to not respond at all. These problems include:
