# WinDoor Safety Daycare Presentation Outline

## **Target Audience**

Toddlers age group 2-5 years old

## **Focus**

- Introduce window and balcony safety awareness
- Identify risks and dangers associated with falls from windows or balconies
- Introduce safe practices to minimize fall risks
- Encourage safety awareness for everyone

#### Medium

• Interactive discussion utilizing music, song, visual displays, and puppetry to engage target group and reinforce safety awareness message.

### **Outline**

Good morning boys and girls, my name is _	and this is my friend
We are Paramedics. Does anyone know what a Paramedic is?	

Paramedics help people that are hurt or not feeling well. We take people to the hospital in an ambulance so they can see a doctor and feel better.

Show the cardboard ambulance

Have any of you ever fallen down? How did you fall? Did you trip while running or did you fall off a piece of furniture? Did you get hurt? Did you have to go to the hospital?

I'm glad no one was hurt really bad and had to go to the hospital.

Sometimes people fall from places that are very dangerous and they can be hurt very bad. Can anyone think of a place in their home that if they fell they would get hurt really bad?

Windows are one of the places that you can get hurt really bad if you fall.

Balconies and decks are another place where you can get hurt really bad if you fall.

If you fell from a window or balcony, you could get hurt really bad and the Paramedics might have to come to take you to the hospital to see the doctor.

We need to learn how to be safe around windows and balconies. One way to be safe is to never climb up and play at a window. The screen in the window is not strong enough to keep you safe and children have fallen through the screens and gotten hurt. Another way to stay safe is to stay away from the balcony or deck unless an adult is with you.
